

HUMANS VS ZOMBIE READ ME

Welcome to Leoul Yiheyis' Lab 4, Human vs Zombie! This is a very simple game that highlights the usefulness and ingenuity of the Pmod ADXL accelerator. Once you start the game, you will encounter the Splash Screen, which will appear for 5 seconds. After, you can pick the time needed to win at the Options screen. Press Buttons 1 & 2 to increment/decrement, and use Button 3 to advance to the game.

Once in the game, the human is the white stick man, while the zombie is the skull and bones slowly moving across the screen. There are two speeds for every direction, a normal speed and a fast speed. You can access these speeds by changing the tilt of the ADXL 345. The zombie only moves at a set, slower pace so it should not be that hard running away from him :)

You win by staying alive for the time you chose on the Options screen. You lose if the zombie catches you! I hope you like the added animation on the win & lose screens.w

Enjoy the game!
